- Journal
- Company Specific Tracking
- More

Interfaces with all other Enterprise Compliance Modules including: Workers Compensation, Training Management, Audits/Assessments, JSA, Corrective Action Tracking, Incident Investigations etc.

A screenshot of a web-based incident management form titled "Incident Form - Fire" displayed in a Microsoft Internet Explorer browser window. The form includes fields for Case Number (2006-0004), Created By (Chris Lewis), and Created On (6/1/2006 9:09 AM PST). It has tabs for General Details, Fire Details, and Causal Factors. The Fire Details section contains fields for Ignition Source (Spark), Item/Equipment (Light bulb), Business interruption? (Yes, No, N/A), and How Long (2-3 hours). The Agency Details section includes Reported to regulatory agency? (Yes, No, N/A), Agency ([SELECT ONE]), Date Reported ([SELECT]), and fields for First Name, Last Name, and Phone. The Employee Related Details section includes Department ([SELECT ONE]), Task Being Performed ([SELECT ONE]), and How often does Employee perform this task ([SELECT ONE]). A text area asks "What was the employee doing just before the incident occurred? (flame tools, equipment, material, and what the employee was doing with them.)". At the bottom, there are tabs for What Happened, Updates, Corrective Actions, Cost / Hours, People Involved, History, and Files. A text area under "What Happened" contains the text: "A light bulb blew out sparking a fire in the main portion of the warehouse. Luckily there was minimal product loss. There were however 2 injuries due to the fire." A "Close" button is located at the bottom of the form.
