- More

Interfaces with all other Enterprise Compliance Modules including: Workers Compensation, Training Management, Audits/Assessments, JSA, Corrective Action Tracking, Fires, Spills, NOV/Agency Visits, Complaints, etc.

A screenshot of a web browser displaying the "Incident Management" application. The browser title is "Incident Management - Microsoft Internet Explorer". The page shows a form for an "Incident Form - Injury/Illness" with Case Number 2006-0004, created by Chris Lewis on 6/6/2006 at 12:34 PM PST. The form is divided into several sections: "Immediate and Underlying Causes", "Unsafe Condition" (Action of Fellow Associate) and "Unsafe Act" (Ignoring safety rules), "Personal Factors" (Horseplay or fooling around) and "Job Factors" (Inadequate supervision for the activity), and "What failure in the safety management system resulted in the immediate and underlying cause(s) of the accident?". There are also sections for "JSA Procedures" and a question "Was the job covered by a JSA or work instruction?". The interface includes navigation tabs at the bottom and a "Close" button at the bottom right.
